

GARBAGE BAGS

BIODEGRADABLE

Available in all the colours

No matter how tough the job, STP trash bags can handle it. From regular household trash to big backyard clean-ups, discover a variety of trash bag sizes and types that can take whatever you throw within them.

Black Trash Bags generally required in 33" x 39" are flexible, stronger and puncture resistant than high density trash bags. Made from reprocessed low-density polyethylene, these garbage bags are made from resins that are highly resistant to puncturing and tearing, so they can be used with heavy trash that has sharp or irregular objects. It's made from reprocessed, recycled plastics and have a durable reinforced gusseted bottom seal.
